

*ABORTION MAY SEEM LIKE YOUR ONLY CHOICE
BUT IT ISN'T*

*"I knew you before I formed you in your mother's womb. Before you were born I set you apart and appointed you as my prophet to the nations."
Jeremiah 1:5*

As "convenient" and "problem solving" as it seems, Abortion ends choices when it ends a life. The leftovers of an abortion are guilt, regret, depression, emptiness, and heartbreak. You will not leave an abortion clinic and forget what happened there. The possibilities of a life not yet fulfilled are gone forever and the person who could have been and should have been is no more.

Abortion clinics are supposed to tell women about all of their options, but somehow they always make abortion seem like the only logical one.

You do have other choices. Supports you need to make life giving decisions are available to you. AGAPE offers an opportunity to think about what might be needed in order to parent the child. To be able to hold and nurture the child and to kiss his cheeks and smile at his first giggles are all possible when you give life.

And if you don't have what is needed to give the child the life you would want for him, you will have an opportunity to help create a family for your child who can nurture his potential through adoption. You even have choices about who his parents will be and what kind of contact you

will have as he grows into his future. You give a childless couple an opportunity to be parents and to fulfill their dreams.

AGAPE provides confidential maternity counseling, free of charge, for any women facing a crisis pregnancy who wants to know what other choices she has and who wants to look to the future with the joy that comes from giving life to a child, one who will make a difference in many lives, maybe even in the world.

Contact Lovette Gaston, 615-781-3000, to take a real look at your options.
